

# Fish Factory Gallery Plan

The gallery space is also home to our café/bar with a flexible seating area. This is open to flexibility and can be modified and/or relocated for exhibitions and events.

All walls (apart from lift door) are approx. 3m high and white painted MDF. These can be screwed or nailed into if walls are made good after the exhibition.

The floor is grey painted concrete and can be fixed into upon request

There is a wood rafter ceiling and steel I-Beams crossing the space. These can be used to support work if required.

There is a limited amount of technical and AV equipment available if required. Please contact for details

Assistance with hanging work may be possible to arrange with notice. Please contact for details

Please contact in advance if you have any specific requirements or for further information or photos.

All measurements are accurate to within 1-2cm and the plan is approximately to scale.
